Greenhouse Gas Management Policy

As BFA Havalimanı Yiyecek ve İçecek Hizmetleri A.Ş., we consider combating climate change, effectively managing our greenhouse gas emissions, reducing our environmental impacts, and using resources efficiently to be among the key elements of our sustainable business approach in our food and beverage operations at Antalya Airport.

Within this framework, we hereby commit to:

- Defining the organizational and operational boundaries of greenhouse gas emissions arising from activities and equipment under our control at Antalya Airport;
- Preparing an annual greenhouse gas inventory for consecutive 12-month periods, covering direct emissions from sources under our control (Scope 1) and indirect emissions from purchased electricity, heating, and cooling (Scope 2);
- Ensuring the reliability, consistency, and traceability of activity data used in emissions calculations; using appropriate, current, and traceable calculation factors; and implementing documented quality assurance practices for measurement equipment used to determine activity data;
- Ensuring compliance with applicable environmental and climate legislation, other relevant obligations, and the principles of our corporate environmental policy;
- Improving energy and water efficiency, reducing direct emissions from refrigerant leakage, food waste, and waste generation, and supporting recycling and recovery practices in order to contribute to the reduction of our greenhouse gas emissions;
- Providing the necessary responsibilities, competencies, and resources for effective greenhouse gas management; raising employee awareness and cooperating with relevant stakeholders;
- Reducing the greenhouse gas emissions intensity calculated based on Scope 1 and Scope 2 emissions from our Antalya Airport operations by at least 5% by the end of 2030, compared with the 2025 base year; monitoring our performance against our targets annually; and reviewing and updating emission reduction actions where necessary;
- Continuously improving the effectiveness of our greenhouse gas management approach and our greenhouse gas performance, and making this policy accessible to relevant stakeholders. We hereby declare and undertake these commitments.
